

SeaMac Gold

Contains seaweed extract with added 80 g/l nitrogen (N), 88 g/l phosphorus (P₂O₅) and 62 g/l potassium (K₂O)

Liquid plant growth stimulant.

Seamac Gold is a solution of extracts of the seaweed *Ascophyllum nodosum* formulated with soluble forms of nitrogen, phosphorus and potassium. It readily disperses in water for straightforward mixing and spraying. Seamac Gold provides essential micronutrients and NPK in a readily available form to help prevent any shortfalls from reducing yield or quality.

RATES OF USE AND TIMING

Cereals:

Apply 3 - 5 l/ha, in the Autumn when the crop has achieved full ground cover. Repeat in the Spring at growth stage 30 - 31 and again (if required) in the Summer at full flag leaf emergence.

Oilseed rape:

Apply 5 l/ha, at stem extension (30 - 40 cm high) and repeat as required up to the end of flowering.

Grassland pasture:

Apply 5 l/ha, in Autumn and Spring during period of maximum growth. In drought conditions, spray immediately after rain has fallen.

Hay and silage:

Apply 5 l/ha, when growth is maximum in the Spring. If reducing fertilizer inputs after the 1st cut, increase the rate to 12 l/ha.

Sugar beet, red beet, fodder beet, mangels:

Apply 5 l/ha, when the crop has achieved full leaf cover. Repeat once or twice during the growing period as required.

Potatoes:

Apply 5 l/ha, 2 weeks after emergence and repeat every 2 to 4 weeks until flowering.

Peas and beans:

Apply 5 l/ha, 6 weeks after emergence. Repeat once if required, before the end of flowering.

Leaf brassicas:

Apply 5 l/ha to developed leaves as active growth commences.

Do not apply this product in very bright sunlight or in temperatures above 25°C. If possible, spray in the evening or early morning for best results.

APPLICATION

Shake the container well before opening and use.

Spray equipment should be clean.

Half fill the spray tank with water, begin agitation and add the required quantity of Seamac Gold. Rinse the container thoroughly, add the rinsings to the spray-tank, complete the filling and apply without delay. Maintain agitation throughout. Clean sprayer thoroughly after use. Guard 2000® can be added at 0.1 %v/v of water volume to improve spray retention and rainfastness.

COMPATIBILITY

Seamac Gold is physically and chemically compatible with a wide range of agrochemical products. Consult your supplier for the latest information. Up-to-date information is available at www.headland-ag.co.uk. Always read the label of the partner product carefully before mixing with Seamac Gold.

STORAGE

Protect from frost. Store above 5°C.

Keep in cool, well ventilated suitable store. Do not store in direct sunlight or near direct sources of heat. Keep out of reach of children. Keep away from food, drink and animal feedstuffs.

SAFETY PRECAUTIONS

H315: Causes skin irritation.

H319: Causes serious eye irritation.
